## March 2021

### EH & EW Strikes

The EH (Extended Height) strike has an increased height latch bolt hole to allow for fluctuations in latch/strike locations.

The centered hole gives an extra 1/4" to the top and bottom of the latch cut out (+1/2" total)

The EW (Extended Width) strike has an increased width latch bolt hole to allow for bowed doors or binding in latch/strike locations.

The centered hole gives an extra 3/16" width, away from the stop, to overcome bowed or binding doors.

#### ***New! Now available in Visual Pack***
